

Scart pin 8: 5v can make TV switch to 16:9 automatically.
12v sets to 4:3. The MAX662ASHDN pin is used to control this:
SHDN to ground is +12V and SHDN to 5V is VIN

Scart pin 16: we use the fact that even when using composite sync MiSTer will still send the vsync signal on VGA pin 14 to signal the scart pin 16 to use RGB.

RCA added for lightguns
